| <b>APPLICATION NO:</b> 14/01304/FUL    | <b>OFFICER:</b> Miss Michelle Payne  |
| <b>DATE REGISTERED:</b> 22nd July 2014 | <b>DATE OF EXPIRY:</b> 21st October 2014   |
| <b>WARD:</b> Warden Hill               | <b>PARISH:</b> Leckhampton With Warden Hill  |
| <b>APPLICANT:</b>                      | Cotswold Homes Limited   |
| <b>AGENT:</b>                          | Mr Alex Young  |
| <b>LOCATION:</b>                       | One Stop Shop, 62 Alma Road, Cheltenham  |
| <b>PROPOSAL:</b>                       | Proposed residential development comprising 11 no. dwellings (7no. three bed houses and 4no. two bed flats) with associated car parking and vehicular access following demolition of existing shop, lock-up garages and Alma Road Garage |

## Update to Officer Report

### 6. SUGGESTED CONDITIONS / INFORMATIVES *(continued)*

The following contaminated land condition was omitted in error from the previous update:

19 The development hereby approved shall not commence on site until the following condition has been complied with and satisfactorily agreed, in writing, by the Local Planning Authority.

i) Site characterisation

A site investigation and risk assessment should be carried out to assess the potential nature and extent of any contamination on the site, whether or not it originates on the site. The investigation and risk assessment must be undertaken by competent persons and a written report of the findings must be produced. The written report is subject to the approval in writing of the Local Planning Authority. The report must include:

- a) a survey of the extent, scale and nature of contamination
- b) an assessment of the potential risks to:
  - human health
  - property (including buildings, crops, livestock, pets, woodland and service lines and pipes)
  - adjoining land
  - ecological systems
  - groundwaters and surface water
  - archaeological sites and ancient monuments
- c) an appraisal of remedial options to mitigate against any potentially significant risk identified from the risk assessment.

This must be conducted in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR11'

ii) Submission of a remediation scheme

Where remediation is required, a detailed remediation scheme to bring the site to a condition suitable for the intended use should be produced and will be subject to the approval, in writing, by the Local Planning Authority prior to implementation. The scheme must include all works to be undertaken, proposed remediation objectives and remediation criteria, timetable of works and site management procedures. The scheme must ensure that the site will not qualify as contaminated land under Part 2a of the Environmental Protection Act (1990) in relation to the intended use of the land after remediation.

iii) Implementation of approved remediation scheme

Any approved remediation scheme must be carried out in accordance with its terms prior to the commencement of the development, other than that required to carry out remediation. Following completion of measures identified in any approved remediation scheme, a verification report that demonstrates the effectiveness of the remediation carried out must be produced and is subject to the approval, in writing, by the Local Planning Authority.

If unexpected contamination is found after development has begun, development must be halted on that part of the site affected by the unexpected contamination until section iv) has been complied with in relation to that contamination.

iv) Reporting of unexpected contamination

In the event that contamination is found at any time when carrying out the approved development, that was not previously identified, it must be reported immediately in writing to the Local Planning Authority. An investigation and risk assessment must be undertaken in accordance with section i) and a remediation scheme submitted in accordance with section ii). Following completion of measures identified in the approved remediation scheme, a verification report must be produced in accordance with section iii).

Reason: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with Local Plan Policy NE4 relating to development on contaminated land.
