Comments: 18th October 2019

I am writing to inform you of my objection to the proposed Hearne Brook flood relief work in Charlton Kings Cheltenham. We are the residents of 75 Beeches Road, Charlton Kings where the proposed flood relief work will take place. We have never had any problems with flooding even in the floods of 2007. The only flooding in this road was the top end of Beeches road. These properties have filled in the drainage ditch which goes against the covenant of these properties, this states residents must maintain their section of ditch to prevent flooding.

If the council carries out the proposed work:

- 1) The water draining from the hill will now be solely directed into my garden which will bring a high risk of flooding.
- 2) This in turn will have an impact on my house insurance as now I have risk of flooding
- 3) This will be involve major works in my garden resulting in a huge eyesore which I totally object to.
- 4) The work will involve destroying my garden where I have planted sentimental trees and shrubs which has taken years to establish and will destroy the wildlife present & cause my wife great distress
- 5) This work will have an impact on the value of my property which I strongly object to.
