Audit Deliverables	7
Results of Interim Audit Work	8
Sector Update	9

The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Authority or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Grant Thornton UK LLP is a limited liability partnership registered in England and Wales: No.OC307742. Registered office: 30 Finsbury Square, London, EC2A 1AG. A list of members is available from our registered office. Grant Thornton UK LLP is authorised and regulated by the Financial Conduct Authority. Grant Thornton UK LLP is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. Services are delivered by the member firms. GTIL and its member firms are not agents of, and do not obligate, one another and are not liable for one another's acts or omissions.

Introduction

This paper provides the Audit, Compliance and Governance Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a local authority; and
- includes a number of challenge questions in respect of these emerging issues which the Committee may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Audit, Compliance and Governance Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

Progress at April 2021

Financial Statements Audit

We undertook our initial planning for the 2020/21 audit in February 2021, and interim audit in March. We expect to begin our work on your draft financial statements in July.

Our interim fieldwork included:

- Updated review of the Authority's control environment
- Updated understanding of financial systems
- Review of Internal Audit reports on core financial systems
- Understanding how the Authority makes material estimates for the financial statements

The results of our work to date are included in this report.

In April, we issued a detailed audit plan, setting out our proposed approach to the audit of the Authority's 2020/21 financial statements.

We will report our work in the Audit Findings Report and aim to give our opinion on the Statement of Accounts by September 2021

Value for Money

The new Code of Audit Practice (the "Code") came into force on 1 April 2020 for audit years 2020/21 and onwards. The most significant change under the new Code is the introduction of an Auditor's Annual Report, containing a commentary on arrangements to secure value for money and any associated recommendations, if required.

The new approach is more complex, more involved and will make more impact. Before beginning work, we will discuss with you:

- Timing
- Resourcing
- Fees

Progress at April 2021 (cont.)

Other areas

Certification of claims and returns

We certify the Authority's annual Housing Benefit Subsidy claim in accordance with procedures agreed with the Department for Work and Pensions (DWP). The certification work for the 2019/20 claim was completed in February 2021, and our findings are included later on this report. The certification work for the 2020/21 claim has not yet begun. We will report our findings to the Audit, Compliance and Governance Committee in our Progress Report in January 2022.

We also certify the Authority's annual Pooling of Housing Capital Receipts return in accordance with procedures agreed with the Ministry of Housing, Communities & Local Government. (MHCLG). The certification work for the 2019/20 return was completed in January 2021, and our findings are included later on this report. The certification work for the 2020/21 return has not yet begun.

Meetings

We met with Finance Officers in January and April as part of our quarterly liaison meetings and continue to be in discussions with finance staff regarding emerging developments and to ensure the audit process is smooth and effective.

Events

We provide a range of workshops, along with network events for members and publications to support the Authority. Your officers attended our Financial Reporting Workshop in February, which helped to ensure that members of your Finance Team were up to date with the latest financial reporting requirements for local authority accounts.

Further details of the publications that may be of interest to the Authority are set out in our Sector Update section of this report.

Audit Fees

During 2017, PSAA awarded contracts for audit for a five year period beginning on 1 April 2018. 2020/21 is the third year of that contract. Since that time, there have been a number of developments within the accounting and audit profession. Across all sectors and firms, the Financial Reporting Council (FRC) has set out its expectation of improved financial reporting from organisations and the need for auditors to demonstrate increased scepticism and challenge and to undertake additional and more robust testing.

Our work in the Local Government sector in 2018/19 and 2019/20 has highlighted areas where financial reporting, in particular, property, plant and equipment and pensions, needs to improve. There is also an increase in the complexity of Local Government financial transactions and financial reporting. This combined with the FRC requirement that all Local Government audits are at or above the "few improvements needed" (2A) rating means that additional audit work is required.

We have reviewed the impact of these changes on both the cost and timing of audits. We have discussed this with your s151 Officer including any proposed variations to the Scale Fee set by PSAA Limited, and have communicated fully with the Audit, Compliance and Governance Committee.

As a firm, we are absolutely committed to meeting the expectations of the FRC with regard to audit quality and local government financial reporting.

Certification of claims and returns

We completed the certification of Housing Benefit claim for Cheltenham Borough Council on 10 February 2021. We also completed the certification of Pooling of Housing Capital Receipts on 29 January 2021. Our findings are set out below.

Housing Benefits Claim

The draft claim form identified total subsidy claimed of £21,880,924. The claim was amended and qualified, and the final claim form reflected subsidy claimed of £21,878,452. The following errors were noted in our report:

- HRA Rent Rebates – An error was identified in prior years in relation to earned income. The Council tested 40 additional cases, and we reperformed a sample. This resulted in an extrapolated error value of £48
- Rent Allowances – An error was identified in prior years in relation to earned income. The Council tested 40 additional cases, and we reperformed a sample. This resulted in an extrapolated error value of £12
- Rent Allowances – An error was identified in prior years in relation to classification of overpayments. The Council tested 40 additional cases, and we reperformed a sample. This resulted in an extrapolated error value of £2,135
- Non-HRA Rent Rebates– An error was identified in the initial testing where the rent liability had been incorrectly calculated, leading to overpaid benefit. The Council tested all claims in Cell 011, and we re-performed a sample. A claim amendment of £20 was made.
- HRA Rent Rebates– An error was identified in the initial testing where the pension credit savings credit had been incorrectly calculated, leading to overpaid benefit. The Council tested all claims in Cell 055 with PCSC, and we re-performed a sample. A claim amendment of £1 was made.
- Non-HRA Rent Rebates - An error was identified in the initial testing where the LHA rate was incorrectly classified, leading to subsidy being overclaimed. The Council tested all claims affected, and we re-performed a sample. A claim amendment of £214 was made.
- There were also 2 additional errors brought forward from the previous year which were tested by the Council and re-performed by the audit team in, which did not result in any additional errors in 2019-20, and hence are considered closed

Pooling of Housing Capital Receipts

Two minor exceptions were noted in relation to the Pooling of Housing Capital Receipts Claim. These do not affect the amounts per the annual return, however we have reported this to MHCLG via our Accountant's Report as required.

Audit Deliverables

2020/21 Deliverables	Planned Date	Status
Audit Plan We are required to issue a detailed audit plan to the Audit, Compliance and Governance Committee setting out our proposed approach in order to give an opinion on the Authority's 2020/21 financial statements and the Auditor's Annual Report on the Authority's Value for Money arrangements.	April 2021	Complete, and included on this agenda
Interim Audit Findings We will report to you the findings from our interim audit and our initial value for money risk assessment within our Progress Report.	April 2021	Complete, and included on this agenda
Audit Findings Report The Audit Findings Report will be reported to the September Audit, Compliance and Governance Committee	September 2021	Not yet due
Auditors Report This is the opinion on your financial statements.	September 2021	Not yet due
Auditor's Annual Report This Report communicates the key issues arising from our Value for Money work.	September 2021	Not yet due

Results of Interim Audit Work

The findings of our interim audit work undertaken to date, and the impact of our findings on the accounts audit approach, are summarised in the table below:

	Work performed	Conclusions and recommendations
Entity level controls	<p>We have obtained an understanding of the overall control environment relevant to the preparation of the financial statements including:</p> <ul style="list-style-type: none"> • communication and enforcement of integrity and ethical values; • commitment to competence; • participation by those charged with governance; • management's philosophy and operating style; • organisational structure; • assignment of authority and responsibility; and • human resource policies and practices. 	Our work has identified no material weaknesses which are likely to adversely impact on the Authority's financial statements.
Walkthrough testing	<p>We have completed walkthrough tests of the Authority's controls operating in areas where we consider that there is a significant risk of material misstatement to the financial statements.</p> <p>Our work to date has not identified any issues which we wish to bring to your attention. Internal controls have been implemented by the Authority in accordance with our documented understanding.</p>	Our work has not identified any weaknesses which impact on our audit approach.
Journal entry controls	We have reviewed the Authority's journal entry policies and procedures as part of determining our journal entry testing strategy and have not identified any material weaknesses which are likely to adversely impact on the Authority's control environment or financial statements.	Our work has not identified any weaknesses which impact on our audit approach. Detailed journals testing will be completed as part of the final accounts audit.
Opening Balances	We have reviewed the Council's brought forward opening balances as at 1st April 2020, and compared them against the audited 31st March 2020 balances to ensure that opening balances had been appropriately brought forward.	Our work has not identified any variances between the prior year closing balances and current year opening balances.

Sector Update

Authorities continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

Revised auditing standard: Auditing Accounting Estimates and Related Disclosures

In the period December 2018 to January 2020 the Financial Reporting Council issued a number of updated International Auditing Standards (ISAs (UK)) which are effective for audits of financial statements for periods beginning on or after 15 December 2019. ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do the Audit, Compliance and Governance Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Additional information that will be required for our March 2021 audits

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2021 in all areas summarised above for all material accounting estimates that are included in the financial statements.

Based on our knowledge of the Authority we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings, council dwellings and investment properties
- Depreciation
- Year end provisions and accruals
- Credit loss and impairment allowances
- Valuation of defined benefit net pension fund liabilities
- Fair value estimates
- Finance lease liabilities

The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority uses management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that:

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

Estimation uncertainty

Under ISA (UK) 540 (Revised December 2018) we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management addresses this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to include:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

How can you help?

As part of our planning risk assessment procedures we routinely make a number of enquiries of management and those charged with governance, which include general enquiries, fraud risk assessment questions, going concern considerations etc. Responses to these enquiries are completed by management and confirmed by those charged with governance at an Audit, Compliance and Governance Committee meeting. For our 2020/21 audit we will be making additional enquiries on your accounting estimates in a similar way (which will cover the areas highlighted above). We would appreciate a prompt response to these enquiries in due course.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:

Insight into accounting for grants in local government financial statements – Grant Thornton

The government has provided a range of financial support packages throughout the COVID-19 pandemic.

We have issued a brief bulletin aimed at helping local government bodies identify the key things they should consider when determining the accounting treatment for these grants in their financial statements for 2020/21.

There are no changes to the accounting treatment for grants as required by the CIPFA Code of Practice on Local Authority Accounting. What has changed, is the extent of additional funding to support the cost of services, to offset other income losses along with grant packages to be paid out to support local business. Local authorities need to consider the nature and terms of the various COVID-19 measures in order to determine whether there is income and expenditure to be recognised in the Comprehensive Income and Expenditure Statement in 2020/21.

The report highlights the factors to consider, including:

- Where the funding is to be transferred to other parties, is the authority acting as principal or as agent?
- Are there grant conditions outstanding?
- Is the grant a specific or non-specific grant?

Our bulletin provides you with links to further information on the various support packages and summarises features that may be relevant to your judgements as you determine the appropriate accounting treatment.

Local authorities need to demonstrate their judgements on the accounting treatment to be reasonable and soundly based and, where these have a significant effect on the accounts, to ensure they include sufficient disclosures to meet the requirements of IAS 1:122.

Please ask your audit manager for the full report:

Local government finance in the pandemic – National Audit Office

The National Audit Office (NAO) report, published in March, notes “The COVID-19 pandemic has been an unprecedented public health and economic emergency. Local authorities in England have made a major contribution to the national response to the pandemic, working to protect local communities and businesses, while continuing to deliver existing services. The pandemic has in turn placed significant pressure on local authorities’ finances, which in many cases were already under strain going into the pandemic.”

The NAO report examines if the Department’s approach to local government finance in the COVID-19 pandemic enabled it to assess and fund the costs of new services which local authorities have been asked to deliver. It also examines whether the Department fulfilled its responsibilities in securing financial sustainability across the sector.

The NAO report concludes “Steps taken by the government, led by the Department, have supported local authorities in the COVID-19 pandemic response. The Department’s successful monthly collection of data and continued intensive engagement with the sector provided a good evidence base to underpin the financial and other support provided by government. Action by the Department and wider government to support the sector has averted system-wide financial failure at a very challenging time and means that the Department has managed the most severe risks to value for money in the short term.

However, the financial position of local government remains a cause for concern. Many authorities will be relying on reserves to balance their 2020-21 year-end budgets. Despite continuing support into 2021-22 the outlook for next year is uncertain. Many authorities are setting budgets for 2021-22 in which they have limited confidence, and which are balanced through cuts to service budgets and the use of reserves.”

The NAO report found that “the combined impact on spending and non-tax income in 2020-21 is £9.7bn – equivalent to 17.6% of revenue expenditure. So far the government has announced £9.1bn of financial support, leaving a deficit of £605m.”

The full report can be obtained from the NAO website:

[Local government finance in the pandemic - National Audit Office \(NAO\) Report](#)

Good practice in annual reporting – National Audit Office

The National Audit Office (NAO) state that the guide, launched in February, “Sets out our good practice principles for good annual reporting and provides illustrative examples taken from public sector organisations who are leading the way in this area.”

The guide draws on examples of good practice from within each of the six sections of an Annual Report:

- Strategy
- Risk
- Operations
- Governance
- Measures of success
- Financial performance

The NAO also state that the guide “provides further examples where bodies have made their context more understandable to the reader through use of graphics and clear language and signposting.”

However, The NAO observe “Done well, reporting in the public sector enables the public and Parliament to understand – with ease and confidence – an organisation’s strategy and the risks it faces, how much taxpayers’ money has been spent and on what, and what has been achieved as a result.”

Further, the NAO note “The significant impacts of the pandemic emerged in the UK in mid-March 2020. This means that, for many organisations, the reporting impact will be greater in 2020-21 than in the prior year. Transparent annual reporting will help stakeholders understand the impact of COVID-19 on an organisation’s strategy, plans and operational and financial performance.”

The full report can be obtained from the NAO website:

<https://www.nao.org.uk/report/good-practice-in-annual-reports-february-2021/>

2019/20 audited accounts – Public Sector Audit Appointments

In December 2020 Public Sector Audit Appointments (PSAA) published figures relating to the audit of 2019/20 local authority financial statements.

PSAA report “Audit arrangements in local councils, police, fire and other local government bodies are continuing to exhibit signs of stress and difficulty. In the latest audit round, focusing on 2019/20 financial statements and value for money arrangements, fewer than 50% of bodies’ audits were completed by the revised target of 30 November.

Figures compiled by PSAA, the organisation responsible for appointing auditors to 478 local bodies, reveal that 55% (265) of audit opinions were not issued by 30 November. This is a further deterioration on 2018/19 audits when 43% of opinions (210 out of 486) were delayed beyond the then target timetable of 31 July.

This year’s timetable has been deliberately eased by Ministers in recognition of the underlying pressures on the audit process and the significant added complications arising from the Covid-19 pandemic. The pandemic has posed practical challenges for bodies in producing accounts and working papers, and for auditors to carry out their testing. Both sets of staff have had to work remotely throughout the period, and the second national lockdown came at a critical point in the cycle.

Questions and concerns about the potential implications of the pandemic for some bodies have meant that both finance staff and auditors have needed to pay particular attention to the financial position of each entity. Additionally, following a series of increasingly challenging regulatory reviews, auditors have arguably been more focused than ever on their professional duty to give their opinion only when they are satisfied that they have sufficient assurance.”

The news article can be found here:

[News release: 2019/20 audited accounts – PSAA](#)

CIPFA Financial Resilience Index

The Chartered Institute of Public Finance & Accountancy's (CIPFA) Financial Resilience Index is a comparative tool designed to provide analysis on resilience and risk and support good financial management.

CIPFA note "CIPFA's Financial Resilience Index is a comparative analytical tool that may be used by Chief Financial Officers to support good financial management, providing a common understanding within a council of their financial position.

The Index shows a council's position on a range of measures associated with financial risk. The selection of indicators has been informed by extensive financial resilience work undertaken by CIPFA over the past five seven years, public consultation and technical stakeholder engagement.

Section 151 officers may also use the index in their annual report to the council setting out the proposed budget for the year and medium-term financial strategy.

While the impact of COVID-19 resulted in a delay to the publication of the index, it is still able to provide a comprehensive pre-COVID baseline, illustrating the financial resilience of authorities as they entered the pandemic."

CIPFA found that "there was a real-terms reduction of £800m in the level of reserves in 2020 compared with the previous year. At the end of March 2020 council reserves levels stood at £24.6bn, around 3% lower than £25.4bn recorded at the same period in 2019."

CIPFA note "The index is made up of a set of indicators. These indicators take publicly available data and compare similar authorities across a range of factors. There is no single overall indicator of financial risk, so the index instead highlights areas where additional scrutiny should take place in order to provide additional assurance. This additional scrutiny should be accompanied by a narrative to place the indicator into context."

The Financial Resilience tool is available on the CIPFA website below:

<https://www.cipfa.org/services/financial-resilience-index-2021?crdm=0>
