

Summary

The purpose of the Impact Assessment Tool is to consider the wide range of possible impacts that a proposed project/policy could have on environmental and social criteria.

Completing this assessment as early as possible will help shape a project or policy into a strong proposal by highlighting positive areas and areas for improvement.

Use of this tool will also help ensure projects and policies are meeting Council commitments to climate as well as other council priorities.

Please complete the following before moving to the **Environment** tab
